PROJECTS

Daftar app (MERN)

After the user creates an account and logs in, the user will be able to track his goals, record his notes, write his diaries, and add his photo

Food Order (React| Redux| Hooks)

The web application allows adding meals, specifying the number with an automatic price calculation, and sending an order through a form to enter user data.

CRUD operations were used using React

Weather app (Node.js)

It is an website that you enter the name of the country and then gives you a message with the weather conditions in that country

React Meetups (React| Redux |Hooks |firebase)

It is a web application that allows the user to save his meetups by saving them in firebase with the ability to add a new meetup and write its details as well as the ability to select his favorite meetings
